

FRUTO

Fruto is the freshest and most modern wine line from Martino Wines. Led by the vision of Fernanda Martino, the winery's current director, it reflects a new generation seeking to craft honest, accessible wines with a strong sense of identity.

Fruto embodies a commitment to nature, sustainability, and the purest expression of the grape. These wines are made without any oak aging, using stainless steel tanks or concrete eggs, and are left unfiltered to preserve their natural character.

The focus is on achieving wines where freshness and balance take center stage, while staying true to our ongoing goal: to explore new expressions of grape varieties that are less common in the Andean terroir, and to show that there is still much more to discover.

The name “Fruto” celebrates this dual meaning: the fruit of the vine transformed into wine, and the fruit of a journey that blends experience, fresh ideas, and sensitivity. The labels reflect this concept, inspired by nature and the essential role of women as a creative force—balancing delicacy, vitality, and character.

Fruto is an invitation to enjoy vibrant, contemporary wines that respect their environment—wines that speak of the present and the future, without forgetting where they come from.

Wine Critics reviews:
